Safety filter downstream of a filter

A safety filter of type INFA-INLINE INF is working downstream of a cleanable filter. In case of a failure of the main filter (e. g. dust blow-out) the Infa-Inline guarantees the steadiness of the entire system.

The filter cartridges of the INF are not cleanable, but will be changed when saturation limit is reached.

Technical data

Filter type		INF 500-980-10 P
Volume flow	[m ³ /h]	900
Filter material		Polyester fleece
Filter area	[m ²]	10
Residual dust content	[mg/m ³]	< 5
Filter housing strength	[mbar]	+/- 500
