

Inf Staub filters certificated for import into the Eurasian customs union

05.01.2016 Pressemitteilungen

The export into the Eurasian federation, which is a customs union of Russia, Byelorussia and Kazakhstan, is impeded by lots of bureaucratic obstacles.

The „technical rules“ were introduced for different industries and products and define general safety requirements. In many industrial sectors they correspond to international norms and standards. However, importers have to licence their products in a special approval procedure.

Inf Staub had certificated its products already according to directives GOST-R and was engaged early in the demands of the new regulations TR. The conformity evaluation is finalized with which Inf Staub filters may have the prescribed labelling of the customs union (EAC identification). There is no obstacle to export certificated Inf Staub filters to Russia, Byelorussia and Kazakhstan.

Our sales engineers are pleased to support you concerning the import of our filters in the Eurasian customs union.
